PROFILE SUMMARY

Data Analyst and Software Development Engineer who works across the full data lifecycle, from building backend APIs and designing data models to collecting, cleaning and analyzing data and presenting it in Power BI. Experienced with Python, SQL, Snowflake and ETL workflows, and known for turning scattered, inconsistent data into KPIs and reports that help teams decide faster. Holds Power BI and SQL certifications and approaches business problems with close attention to accuracy.

EXPERIENCE

Aventior — Software Development Engineer & Data Analyst **Feb 2025 – Present**

Backend Development | Data Modeling | Business Intelligence

- **Backend development:** Built and maintain RESTful APIs that handle 200+ secure data exchanges every day across enterprise systems.
- **Data modeling and architecture:** Designed data models, schemas and overall data architecture for each client project, structuring tables and relationships around the project's reporting and integration needs.
- **Integration:** Developed end-to-end data pipelines and middleware linking SFA and SAP, so data arrives reliably and in near real time.
- **Performance:** Optimized database schemas and queries, which cut response times by 30% and increased system throughput.
- **Data collection and cleaning:** Collect data from multiple source systems and Snowflake, then clean, validate and standardize it into analysis-ready datasets.
- **KPIs and reporting:** Define KPIs tied to business goals and build Power BI reports and dashboards that give stakeholders clear, usable insights.
- **Domain research:** Studied pharmaceutical drug development and clinical trials in India to support client compliance and operational setup.

Shreetech Associates, Mumbai — Business Analyst Intern **Jan 2025 – Jul 2025**

- Created executive-level Power BI dashboards that reduced manual reporting work by 40% and helped leadership make decisions faster.
- Used SAS to extract and transform data and to evaluate campaign effectiveness for strategic planning.

S2 Infotech — Data Integration Intern **Aug 2024 – Dec 2024**

- Wrote Python and SQL workflows to clean and transform 8TB of enterprise data, cutting processing time by 65%.
- Delivered real-time KPI dashboards for 15+ projects, improving stakeholder visibility and operational transparency by 40%.

Adroit Share & Stock Broker — Data Analyst & SDE Intern **Mar 2024 – Jul 2024**

- Built Power BI financial dashboards that let traders spot market trends 25% faster.
- Combined five manual NSE trading processes into automated workflows, improving operational efficiency by 35%.
- Set up AWS Route 53 for domain routing and health checks, supporting 99.9% system uptime.

EDUCATION

B.Tech in Information Technology, K.J. Somaiya College of Engineering **2021 – Present**
CGPA: 7.45

12th HSC, Rao Junior College of Science **2019 – 2021**
Result: 97.25%

KEY PROJECTS

EngEase: Career Analytics Platform

- Architected an AI-driven platform that reviews resumes with 90% accuracy and runs adaptive mock interviews.
- Built machine learning models that give tailored career guidance, drawing on 1,000+ career trajectories.

Landslide Detection System

- Mapped 1,200+ landslide events using satellite imagery and geospatial analysis.
- Developed a detection model with 89% precision for early risk assessment in vulnerable regions.

AI-Powered Hospital Management Agent

- Built an intelligent agent that automates patient triage and lowered average wait times by 40%.
- Added ML-based insurance verification that sped up claims processing by 60%.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, REST APIs
- **Analytics & BI:** Power BI, Tableau, Excel, ETL, Data Warehousing, Data Modeling, Snowflake
- **Cloud & DevOps:** AWS, Docker, Git, Jira
- **AI/ML:** Machine Learning, NLP, Agentic AI
- **Testing & QA:** API Testing, Unit Testing, Selenium, VAPT

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate (2024)
- Neo4j Certified Professional (2024)
- NISM-Series-VIII: Equity Derivatives (2024)
- AWS Cloud Practitioner Essentials
- Prompt Engineering for ChatGPT
- Foundations of UX Design
- High-Fidelity Prototyping in Figma
- SQL for Data Science

ADDITIONAL EXPERIENCE

Khaas Chaas — Co-founder & Product Manager **2023 – 2024**

- Co-founded a beverage startup and led technical product development and feature delivery.
- Managed the website launch and put a supply chain tracking system in place to streamline operations.

LEADERSHIP & VOLUNTEERING

- Taught data literacy to 200+ students through the JP Morgan–Agastya Foundation program.
- Captained the football team to the Division II regional finals.
